How to handle null

- You should use it in constructors, too

```
public class Periode {  
  
    private final Date start;  
  
    private final Date end;  
  
    public Periode(final Date start, final Date end) {  
        start = Objects.requireNonNull(start, "start must not be null");  
        end = Objects.requireNonNull(end, "end must not be null");  
    }  
}
```

@Thomas_Wendt

In the past few weeks I've had two potential clients whose products are designed to enable remote work. Both of them wanted me to be on site full time. Has the world gone mad?

Me: Wow I work remote now. I'm going to travel the whole world.

Me six months later: Hi I'd like to cancel my co-working membership I'm finding it difficult to leave my house and drive the ten minutes it takes to get here. Also putting on shoes seems like a lot of effort.

Benefits

- No commute
- Responses to co-workers don't have to be real-time
 - You can respond to chats when you have a well-thought-out response
- More flexible work schedule
- Fewer interruptions from co-workers (usually)
- Less office drama
- You can optimize your workspace

Drawbacks

- Less human interaction
 - Harder to make friends at work
- If part of the team works in the same office, you can be left out
- Less of a “team” feel (more isolated)
- Others may be less likely to work with you on a task/problem
- Management may think they can fix other problems by having you on-site
- Interruptions from family members

I was a bit disappointed that	I am annoyed that	It doesn't really matter
Very interesting	The idea is nonsense	They are impressed

Build a common understanding

- Have information transparent for everybody
 - <https://about.gitlab.com/handbook/>
 - Wiki
- Video chat and meetings – share that extra communication dimension
- Screenshare
- Use chat rather than e-mail when possible
 - Slack reigns supreme, but is it the best?

The Ivy Lee Method

1. At the end of each work day, write down the six most important things you need to accomplish tomorrow. Do not write down more than six tasks.
2. Prioritize those six items in order of their true importance.
3. When you arrive tomorrow, concentrate only on the first task. Work until the first task is finished before moving on to the second task.
4. Approach the rest of your list in the same fashion. At the end of the day, move any unfinished items to a new list of six tasks for the following day.
5. Repeat this process every working day.

The Pomodoro Technique

1. Choose a task you'd like to get done
2. Set a timer for 25 minutes
3. Work on the task until the timer rings
4. When the timer rings, put a checkmark on a paper
5. Take a short break (2-5 min)
6. Every 4 pomodoros, take a longer break (20-30 min)

Other Productivity Tips

1. Batch Email
2. Batch Social Media
3. Block Social Media Feeds & Delete Apps
4. Choose your work intelligently
5. Schedule Self-Care Time
